TREATMENTS AT LE KALON SPA KARIN HERZOG FACIALS

PORE DRAW FACIAL

Voted "the best facial in the world" by The Times, this is the treatment that most people start with and continue with until their skin is balanced and clear of major congestion. Enjoyed regularly by the entire cast of "Friends" to ensure that they have clean and bright complexions. This is the only safe extraction facial. The oxygen sterilises both the therapist's hands and the client's skin, and makes sure that there is no risk of cross infection. The oxygen then goes deep into the skin creating a force and an energy that pushes trapped toxins and congestion, up towards the surface for easy extraction. Finally the same oxygen works to heal and repair the skin following extraction. Results are visibly clearer skin not swollen or angry. Suitable for both men and women living in London where pollution is high and the skin needs that helping hand.

SMOOTHIE

This facial is essential for good skin maintenance. It works on anti-ageing principles to maintain the skin. The ideal once a week treatment for your skin. A divine, holistic, hand on treatment with no mechanical intervention. Results give an instant face-lift and radiance that lasts long after you have left the salon, making it a truly unique experience. Using mild fruit enzyme serums, to gently exfoliate, this facial reveals fresh oxygenated youthful skin. Voted top in a review of all other top of the range salon facials, this treatment is a true age management, skin maintenance treatment. Essential for smoker's, whose skin is starved of vital nutrients. This treatment guarantees long term dividends. Skin looks fresher more vibrant, instantly, and gives the appearance of having just completed a ski run.

GLYCO ROSE PEEL

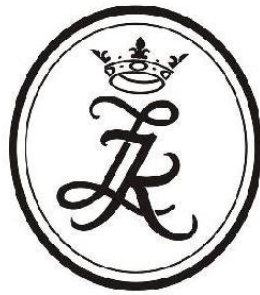

The ultimate in the Lunch hour facelift. Although only a 30-minute facial, this treatment is light years ahead of rival "peel" therapy facials. The root to its enhanced performance lies in the ancient art of ACUPRESSURE, and the amazing benefits of Herzog's patented Oxygen therapy. In this treatment we use our strongest percentage of oxygen (3.6%). This converts to oxygen gas, as do all Herzog's oxygen formulas when applied to human skin. This conversion causes an increase in pressure with the oxygen gas being denser than the liquid. The higher the oxygen content, the stronger and greater the pressure. It follows therefore, that by using 3.6% liquid oxygen, the pressure generated is great. As the cream rapidly self penetrates deep into the dermis it creates an acupressure effect on the main meridian/pressure points of the face. In conjunction the specific massage technique used in this facial ensures that real energy swirls in and out of each major meridian to ensure that blockages, stress and tension are eliminated, and the face is lifted as a result.

In addition, because our products do not contain perfume, there is an unmistakable aroma of pure chocolate, which is known for its anti-depressant and stimulatory effect to lift and energise the spirit.
